CAREER OBJECTIVE

- Motivated Computer Science graduate with good academic score of 8.44 CGPA. Seeking a Java Developer role to leverage programming skills, contribute to real-world projects, and grow as a software professional in a dynamic and challenging environment. Skilled in Java, OOP'S concepts, and database management, with the ability to build efficient applications while continuously learning and contributing to organizational growth.

SKILLS

- **Programming:** Java
- **Frontend:** HTML5 , CSS , JavaScripts
- **Backend:** JDBC , JSP , Spring boot , Hibernate
- **Database:** MySQL
- **Core:** OOPs

PROJECTS

- Cybersecurity - Suspicious Web Threat Interactions | Machine Learning** April 2025 - May 2025
- Developed a system to **detect suspicious web activities** using anomaly detection techniques.
 - Performed **data preprocessing and feature engineering** on web traffic logs.
 - Applied **classification models** to identify potential cyber threats.
 - Improved detection accuracy by analyzing patterns in user behavior and request logs.
 - **GitHub:** ranjan0910

- Health Data-Based Food Recommendation System | Python , MySQL , flask** Nov 2025 - May 2025
- Built an intelligent recommendation system that provides personalized meal suggestions using health data and nutritional analytics.
 - Applied content-based and collaborative filtering techniques to recommend food items according to user preferences and dietary requirements.
 - Developed BMI and calorie prediction models for personalized nutrition planning.
 - Processed and analyzed health-related datasets to generate actionable dietary recommendations.

EXPERIENCE

- Unified Mentor** April 2025 - May 2025
- Intern*
- Analyzed **web traffic logs** to detect anomalies and suspicious activities.
 - Implemented **machine learning models** for threat detection and classification.
 - Worked on **data analysis pipelines** to extract meaningful insights from large datasets.
 - Identified patterns indicating potential **cybersecurity threats**.

- Tap Academy** Feb 2026 - current
- Java Full Stack Developer — Training*
- Mastered Core Java, Object-Oriented Programming (OOP) architectures, Exception Handling, Multi-threading, and data structuring using the Java Collections Framework.
 - Designed responsive user interfaces using HTML5, CSS3, JavaScript, and React; engineered relational databases and wrote complex queries using MySQL.
 - Solved algorithmic challenges focusing on data structures, arrays, Strings, Sets and Maps.
 - Designed relational database schemas using Entity-Relationship (ER) diagrams; authored optimized SQL queries utilizing complex Joins, Views, Stored Procedures.

ACHIEVEMENTS

- Built and deployed a **cybersecurity-focused machine learning project**.

EDUCATION

- Dr. DY Patil School of Engineering and Technologies** Pune, Maharashtra
- B.E in Computer Science, CGPA: 8.44* 2021 - 2025
